ABOUT THE BOOK

Sometimes people do things that make it hard for other creatures to survive. *A Place for Butterflies* clearly yet gently explains some of the ways human action and inaction can affect butterfly populations.

The book focuses on eleven North American butterfly species and shows each one in its natural habitat. Simple text describing each butterfly’s food sources and struggle to survive is perfect for young children reading on their own. Sidebars with additional information extend the usefulness of the book to older children and to young children reading with a teacher or parent. Sections at the beginning and end of the book include information about the life cycle of butterflies, their role in the food chain, and simple things readers can do to help protect and preserve butterflies. The endpapers feature range maps for all of the butterfly species discussed in the book.

*A Place for Butterflies* opens readers’ minds to a wide range of environmental issues, and its concrete examples of cause and effect show children how the choices we make can have far-reaching consequences for butterflies and other creatures that share our world.

SKILLS REINFORCED

- Compare and contrast
- Cause and effect
- Sorting and sequencing

THEMES

- Butterflies and insects
- Animal adaptations
- Endangered species
- Interdependence of living things
- Habitats
- Life cycles
- Human impact on the environment

TEACHING SUGGESTION

The two levels of text in this book make it ideal for Reading Buddy programs, which are now popular in many schools. For more information, please see:

CCSS ELA RIT #1 & 2, NGSS PE K-ESS3-3

The activities in this guide directly address a variety of standards across the curriculum. Following each activity, you’ll find an abbreviation for the standard(s) it supports. For a complete list of the Common Core Math and English Language Arts Standards and Next Generation Science Standards addressed, please see page 6.
BEFORE YOU READ

Grades K–2
- After looking at the cover of the book and reading the title, ask students what they think *A Place for Butterflies* will be about. Write their responses on chart paper. **CCSS ELA RIT #2**
- Provide a list of vocabulary words and discuss their meanings. **CCSS ELA RIT #4**
- Look at the range maps on the endpapers and work with students to identify butterflies that live in your area.

Grades 3–5
- Ask students to predict the main idea of *A Place for Butterflies*. Write their responses on chart paper. **CCSS ELA RIT #1 & 2**
- Have the students discuss the following questions in small groups. Before reading the book, compile the groups’ answers on chart paper.
  3. List some different habitats where you might find butterflies.
  4. Does the survival of butterflies affect the survival of plants and other animals? Explain why or why not.
- Provide a list of vocabulary words. Encourage students to buddy up and work together as they look up the words in a dictionary and write definitions. **CCSS ELA RIT #4**

AS YOU READ

Grades K–2
Ask students to think about the main idea of the book. **CCSS ELA RIT #2**

Grades 3–5
- Encourage students to think about the main idea of the book. Do they hear details that can support that main idea? They may want to make notes on a piece of paper. **CCSS ELA RIT #2**
- Students should also think about the ideas you recorded on chart paper. Are there things they would like to change or add? They may want to make notes on a piece of paper.

AFTER YOU READ

Grades K–2
- Ask students to identify the main idea of *A Place for Butterflies*. Work with them to find details that support that idea. List them on chart paper. **CCSS ELA RIT #1 & 2**
- Choose two butterflies in the book and ask students to compare them. Students should consider each butterfly’s body size and coloring as well as its range, habitat, and food sources. Explain the usefulness of a Venn diagram (overlapping circles showing similarities and differences) and lead students in creating one. **NGSS PE K-LS1-1 &K-ESS3-1**

Grades 3–5
- Ask students to identify the main idea of *A Place for Butterflies* and recall details that support that idea. List them on chart paper. **CCSS ELA RIT #1 & 2**
- As a class or in smaller groups, have students add new information or erase incorrect information you recorded earlier on chart paper.

CLASSROOM ACTIVITIES

SCIENCE

Grades K–2
- Using information in *A Place for Butterflies*, invite students to work in pairs or small groups to create 11×17 inch posters that show how people in your community (including the students themselves) can help local butterflies live and grow. **NGSS PE K-ESS3-3**
- Young children can often see and evaluate the actions of others, but they may have trouble understanding the impact of their own behaviors. And yet, they need that awareness before they can get involved in meaningful conservation.
  To help students develop their thinking in this direction, encourage them to discuss how they might be harming the environment without even realizing it. They can use some examples from *A Place for Butterflies* as thought starters. Then encourage students to suggest ways they might change their behavior to help protect animals and preserve natural environments in your community. **NGSS PE K-ESS3-3**
- Invite students to pretend they are butterflies. Ask them to describe what it feels like to flit through the air. Then ask what they wish people would do to help them live and grow. Consider recording a few children’s responses with the video setting on a digital camera. These recordings can be replayed later on your interactive whiteboard. **CCSS ELA SL #2 & 3, NGSS PE K-LS1-1**
Grades 3–5

- Sing Melissa Stewart’s Butterfly Life Cycle Song with your class: [www.melissa-stewart.com/pdf/ButterflyLifecycleSong.pdf](http://www.melissa-stewart.com/pdf/ButterflyLifecycleSong.pdf). Then divide the class into small groups and invite each team to create a life cycle song for another kind of animal. **CCSS ELA Writing 2, 4, & 8, NGSS PE 3-LS1-1**

- Children love to learn by doing, so try this kinesthetic activity. Have your students count off by fours. All number ones should go to the front of the classroom. Ask them to pretend they are butterfly eggs. Number twos should stand on the right-hand side of the room. They will pretend to be caterpillars. Threes should go to the back of the room and act like pupae, and fours should stand on the left-hand side of the room and pretend to be adult butterflies. After a few minutes, reassign roles so that eggs become caterpillars, caterpillars become pupae, etc. When all four groups have enacted each life stage, ask students to draw a butterfly life cycle. **NGSS PE 3-LS1-1**

- Divide the class in half and have each team create a Book Fact Scavenger Hunt for the other team. Have students look through *A Place for Butterflies* and other books about butterflies. (See Related Reading at the end of this guide for suggestions.) They should choose a few interesting facts and turn them into questions. Here are some examples:
  - In *A Place for Butterflies*, can you find a butterfly that lives in the woods?
  - In *A Butterfly Is Patient* by Dianna Hutts Aston (Chronicle Books, 2011), where does the world’s smallest butterfly live?

  Type each team’s questions, print them out, and cut them so each question is on a separate strip of paper. Place the questions in two bags or boxes, so the students can pick one question at a time and compete to see which team can answer the most questions. **CCSS ELA RIT # 9, Writing #7 & 8**

- Have each student research one of the butterflies discussed in the book and write a report. Each report should include the duration of each life stage, habitat and range, food sources of adult and caterpillar, the viability of the species, and any fun facts the student discovers. **CCSS ELA Writing #2, 4, 7 & 8**

**MATH**

Grades K–2

- Give each student a copy of Activity Sheet 1 at the end of this guide. Ask students to illustrate and then solve each problem. If you’d like to reinforce species identification, make the book available so students can use the proper colors. **CCSS Math OA.A.1 & A.2**

  Answers to questions are: 1. 7, 2. 7, 3. 9, 4. 4

- Using artwork in the book, show students that the patterns on butterfly’s wings are symmetrical. Have students cut out a large butterfly and paint a pattern of dots on one half. (Make sure students leave plenty of space between the dots.) Then ask students to fold the butterfly in half and press the painted side against the blank side. Their butterfly wings will end up with the same pattern on both sides. **CCSS Math G A.1**

**Grades 3–5**

Divide the class into teams of three or four and give each group a copy of Activity Sheet 2. Using a ruler and a map of the United States with a key, have students find the values to fill in distances between cities. Then they can calculate the total distance of the butterfly’s migration and the average number of miles traveled each day. **CCSS Math MD.B.4**

**LANGUAGE ARTS**

Grades K–2

- Have students create as many words as possible with the letters in *A Place for Butterflies*. Then ask the children to sort the words by: number of letters in each word, vowel sounds, and word families, such as at, eat, ace, and ate. (See suggestions below.) Ask the students to alphabetize the words. **CCSS ELA FS #2**

  First round: at, pat, fat, cat, cats, bat, bats

  Second round: eat, seat, beat, bleat, bleats

  Third round: ace, base, race, races, place

  Fourth round: ate, fate, late, rate, plate

- Pass out copies of Activity Sheet 3 at the end of this guide and ask students to complete the word search.

- Give each student a copy of Activity Sheet 4 at the end of this guide and ask them to complete it.

- Work with students to create seesaw books about two different butterflies, such as monarchs and Karner blues.

  On the first left-hand page, they might write:

  Subsequent pages should continue to compare and contrast the two species—size, habitat, range, etc. Students can use webs to help them organize their thoughts. **CCSS ELA RIT Writing #2, NGSS PE K-LS1-1 & K-ESS3-1**
Grades 3–5
- Have students pretend they are butterflies. Ask them to write down the name of each butterfly species as well as the human cause that’s helping that butterfly and the specific effect on the animal. CCSS ELA RIT #5, NGSS PE5-ESS3-1

Note: Even though the endpapers contain twelve maps, the black swallowtail does not have an accompanying cause and effect page. So, it’s best not to include this butterfly in your students’ books.

- Activity Sheet 5 asks students to compare and contrast how humans interacted with butterflies in the past and present. Give each student a copy of the worksheet and ask them to complete it. CCSS ELA RIT #5

- Have students write letters to author Melissa Stewart, telling her what they liked best about A Place for Butterflies. Send the letters to Author Mail, Peachtree Publishers, 1700 Chattahoochee Ave., Atlanta, GA, 30318. If you include an e-mail address, Melissa will send an e-mail to your class. If students send drawings, she will choose a few to post. CCSS ELA Writing #1

- Divide the class into teams of three or four for a game of Butterfly Boggle. Choose one butterfly species name and give students three minutes to think of as many words as possible from the letters in the name. One member of each team should record the answers while the others manipulate the letters.

As each group reads its words, other teams cross off any repeats. The team with the most original words wins. Repeat the game with other species names, so that each student has a chance to be the recorder. CCSS ELA FS #3

ART
Grades K–2
Have students create an image of one of the butterflies in A Place for Butterflies and its habitat, highlighting what the animal needs to live and grow. Make materials with a variety of textures available, including paints, magazines, and fabric. Some students might like to use plastic wrap for water or cotton balls for clouds. Encourage them to use their imaginations. NGSS PE K-ESS3-1

Grades 3–5
Have students look carefully at the background art on each two-page spread of A Place for Butterflies. As a class, list all the questions the book’s illustrator, Higgins Bond, had to ask herself about each spread before beginning her paintings.

Possible questions include: Where is the habitat? What plants grow there? What time of day is it? What time of year is it? What other animals should be shown? How many butterflies should be shown? What are the butterflies in the illustration doing? Using their list of questions, have students research and create a mural that depicts a natural butterfly habitat in your community. CCSS ELA RIT #7
GEOGRAPHY
Grades 3–5
Have students review the range maps shown on the endpapers of the book and recall all the butterflies that live in your area. Emphasize that the butterflies discussed in this book represent only a fraction of the 2,700 species that live in North America. Have students do research to find out about additional species in your area.

ADVANCED ACTIVITIES

• Have students research organizations that support the protection of one of the butterfly habitats mentioned in this book. They should contact one organization and find out about its recent work. Students should write a report and deliver an oral presentation about what they have learned. CCSS ELA Writing #6 & 8, NGSS PE 5-ESS3-1

• Have students make a list of some of the things people do to harm the butterflies discussed in this book. Then have them list ways people could change their behaviors to help butterflies. Next, ask students to list some things they do every day that could harm the environment or the animals that share our world. Can they think of ways to modify their behavior? (Possibilities include wasting electricity; wasting water; forgetting to recycle; littering; using straws, and heavily packaged foods, such as drink boxes; throwing out old clothes, games, toys, bicycles instead of donating them to charities.) Can they think of ways to modify their behavior? CCSS ELA RIT #5

• Have students write a letter to a town official or congressperson asking them to change a policy or make a law that will positively impact the habitat where butterflies live. CCSS ELA Writing #1 & 4, NGSS PE 3-LS4-4

• Divide students into teams of three or four and ask each group to pretend it is a news team. They should make a video of a mock news report about a local effort to preserve and protect butterflies or other creatures and/or open space. CCSS ELA Writing #7 & 8, NGSS PE 5-ESS3-1

THE ACTIVITIES IN THIS GUIDE DIRECTLY ADDRESS THE FOLLOWING STANDARDS:

COMMON CORE FOR ENGLISH LANGUAGE ARTS STANDARDS
- Reading Informational Text #1 and 2: Identifying Key Ideas and Details
- Reading Informational Text #4: Craft and Structure
- Reading Informational Text #5: Identifying Text Features and Structures
- Reading Informational Text #7: Integration of Knowledge and Ideas
- Reading Literature #4: Craft & Structure
- Writing #1, 2, and 3: Text Types and Purposes
- Writing #4 and 6: Production and Distribution of Writing
- Writing #8 and 9: Research to Build and Present Knowledge
- Foundation Skills: Phonological Awareness #2
- Foundation Skills: Phonics and Word Recognition #3
- Speaking and Listening: Comprehension and Collaboration #2 and 3

COMMON CORE FOR MATH STANDARDS
- Operations & Algebraic Thinking A.1, A.2
- Geometry A.1
- Measurements & Data B.4

NEXT GENERATION SCIENCE STANDARDS PERFORMANCE EXPECTATIONS
- K-LS1-1. Use observations to describe patterns of what plants and animals (including humans) need to survive.
- K-ESS3-1. Use a model to represent the relationship between the needs of different plants or animals (including humans) and the places they live.
- K-ESS3-3. Communicate solutions that will reduce the impact of humans on the land, water, air, and/or other living things in the local environment.
- 3-LS1-1. Develop models to describe that organisms have unique and diverse life cycles but all have in common birth, growth, reproduction, and death.
- 3-LS4-4. Make a claim about the merit of a solution to a problem caused when the environment changes and the types of plants and animals that live there may change.
- 5-ESS3-1. Obtain and combine information about ways individual communities use science ideas to protect the Earth’s resources and environment.

Melissa Stewart’s A Place for… series:
- A Place for Bats
- A Place for Birds
- A Place for Butterflies
- A Place for Fish
- A Place for Frogs
- A Place for Turtles

Also available from Melissa Stewart:
- Beneath the Sun
- Under the Snow
- When Rain Falls
1. Anna planted three sunflower seeds in her garden in California. Her mom planted four more sunflower seeds. How many sunflower seeds did they plant all together? _____________

2. There were ten Atlantic cedar trees in a swamp in Georgia. Three of the trees died. How many trees were left? _____________

3. There were three logs in a forest in Connecticut. Three mourning cloaks rested on each log. How many mourning cloaks were there all together? _____________

4. Twelve eastern tiger swallowtails rested on three cherry trees in Washington D.C. Each tree had the same number of butterflies. How many butterflies were on each tree? _____________

Language Arts: Activity Sheet 2
MONARCH MIGRATION

Name: ________________________________ Date: ______________

1. Use a map and ruler to find out how far a migrating monarch butterfly travels each week.

2. Calculate the distance of its entire northward journey.

3. Determine the average number of miles a hermit thrush travels each day.

Week 1: Augusta, Maine to Boston, Massachusetts Miles: _________

Week 2: Boston, Massachusetts to Trenton, New Jersey Miles: _________

Week 3: Trenton, New Jersey to Dover, Delaware Miles: _________

Week 4: Dover, Delaware to Richmond, Virginia Miles: _________

Week 5: Richmond, Virginia to Raleigh, North Carolina Miles: _________

Week 6: Raleigh, North Carolina to Columbia, South Carolina Miles: _________

Week 7: Columbia, South Carolina to Montgomery, Alabama Miles: _________

Week 8: Montgomery, Alabama to Baton Rouge, Louisiana Miles: _________

Week 9: Baton Rouge, Louisiana to El Paso, Texas Miles: _________

Week 10: El Paso, Texas to El Rosario, Mexico Miles: _________

Total miles: _________

Average miles flown daily: _________
antenna  flutter  migrate
butterfly  forest  molt
caterpillar  garden  monarch
chrysalis  hatch  pupa
egg  insect  swallowtail
field  larva  wing
Text features help readers understand a text. Read the name of each text feature included in *A Place for Butterflies* in the left-hand column. Then, find the correct definition in the right-hand column. Write the letter of the correct definition next to each text feature.

1. Bibliography _____ A. This text helps reader learn more about the topic.

2. Close-up _____ B. This large type contains the most important information in the book.

3. Text Box _____ C. Gives readers visual geographic clues that help readers know where animals live.

4. Heading _____ D. Helps readers understand how the author gathered the book’s information.

5. Main Text _____ E. Helps readers see details in something small.

6. Maps _____ F. Gives readers clues about what he or she will learn from the text.

A Place for Butterflies

by:__________________________
Author Melissa Stewart uses a cause and effect nonfiction text structure in the main text of *A Place for Butterflies*, but in the text boxes, she compares and contrasts past human actions to present human actions.

**Directions:** Find the text boxes listed below. For each text box, compare and contrast then to now.

**Example:** Mitchell’s Satyrs

**Then:** People collected Mitchell’s satyrs because they are so beautiful.

**Now:** It is against the law to catch and keep the butterflies.

**Schaus Swallowtail**

**Then:** __________________________________________________________________________

________________________________________________________________________________

**Now:** __________________________________________________________________________

________________________________________________________________________________

**Oregon Silverspot**

**Then:** __________________________________________________________________________

________________________________________________________________________________

**Now:** __________________________________________________________________________

________________________________________________________________________________
Palos Verdes Blue

Then: __________________________________________________________

________________________________________________________________________________

Now: __________________________________________________________________________

___________________________________________________________________________

Monarch

Then: __________________________________________________________________________

________________________________________________________________________________

Now: __________________________________________________________________________

________________________________________________________________________________

Harris’s Checkerspot

Then: __________________________________________________________________________

________________________________________________________________________________

Now: __________________________________________________________________________

________________________________________________________________________________

Bonus Question:

Look at the names of the butterflies in the book. Are they written in bold or italic print?
