Sales Handle:

This eloquent and informative picture book, a companion to the other A Place For... books, shows how human activities can hurt or help frogs and other creatures that share our world.

Description:

In simple yet informative language, award-winning children’s science writer Melissa Stewart introduces readers to some of the ways human action or inaction can affect frog populations. More than just a book about frogs, A Place for Frogs will open readers’ minds to a wide range of environmental issues. Describing various examples—from the northern leopard frog in Minnesota ponds to the Panamanian golden frog—the text provides an intriguing look at frogs, at the ecosystems that support their survival, and at the efforts of some people to save them.

Selling Points:

- **UPDATES INCLUDE** four new species of frogs (Chiricahua leopard frog, American toad, Panamanian golden frog, Eastern spadefoot toad), three species removed (Puerto Rico rock frog, Houston toad, harlequin frog) modifications to additional illustrations, and updated text throughout
- **EASY-TO-UNDERSTAND LANGUAGE** and beautiful paintings introduce readers to the world of frogs
- **PART OF THE ACCLAIMED A Place For... series;** more than 80,000 copies of series books sold
- **HOT TOPIC FOR CLASSROOM STUDY;** helps readers learn how to protect frogs and their homes
- **TEACHER’S GUIDE** available

Author Bio and Residence:

Melissa Stewart has written more than a hundred books for elementary, middle school, and high school readers, including many award-winning titles. When Melissa is not exploring natural areas near her home in eastern Massachusetts, she enjoys visiting exotic habitats around the world.
